HARI PRASAD GUNTUKU

Data Analyst | SQL | Python | Power BI | Tableau | Excel | Statistics

Hyderabad, India | +91 8555081508 | connect.hpg@gmail.com

linkedin.com/in/dot-hpg | github.com/dot-hpg | Portfolio: hariprasad-data-analyst.vercel.app

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of industry experience building the SQL and Python pipelines, Power BI dashboards and validation checks business teams use to track KPIs. Strong in advanced SQL (CTEs, window functions, BigQuery), statistics (hypothesis and A/B testing, confidence intervals, regression) and customer analytics (RFM, CLV), ending every analysis in a clear recommendation. Completed 8 analytics case studies on up to 550K records; pursuing an M.S. in Computer Science (AI & ML).

TECHNICAL SKILLS

SQL: PostgreSQL, MySQL, BigQuery, DuckDB, Joins, CTEs, Window Functions, Subqueries, Aggregations, Data Modeling
Python: Pandas, NumPy, SciPy, Statsmodels, Scikit-learn, Matplotlib, Seaborn, Jupyter
BI & Reporting: Power BI (DAX, Power Query, Data Modeling), Tableau (LOD, Parameters), Excel (Pivot Tables, XLOOKUP)
Statistics: EDA, Hypothesis Testing (t-test, ANOVA, Chi-Square), A/B Testing, Confidence Intervals, Bootstrap, Regression
Analytics & Tools: Customer Segmentation, RFM / CLV, Cohort Analysis, Forecasting, ETL, Data Validation, Git, Docker

PROFESSIONAL EXPERIENCE

Data Analyst | Ivue Technologies Pvt. Ltd., Hyderabad — Mar 2024 – Present

- Built and automated SQL and Python data pipelines (joins, CTEs, window functions) to extract, transform and report data for multiple business units, replacing manual spreadsheet pulls and making recurring reports consistent and on time.
- Designed and maintained Power BI dashboards and KPI reports, working with business stakeholders to define requirements, metric definitions and refresh schedules so every team read the same numbers.
- Analyzed large operational and customer datasets in Python and Excel to surface behavior patterns and business opportunities, and presented findings and recommendations to business leads.
- Built RFM segmentation and customer lifetime value (CLV) models to identify high-value customer groups, informing targeted retention and marketing strategies.
- Added validation and reconciliation checks across pipelines so source data, reports and dashboards always matched.

DATA ANALYTICS PROJECTS

Target Brazil: E-Commerce Operations Analysis | *SQL, BigQuery, Python* — github.com/dot-hpg/target-brazil-sql-case-study

- Wrote 30 BigQuery SQL queries over 99,441 orders across six deep-dives: order value grew 137% year over year, very late deliveries cut review scores from 4.32 to 1.70, and same-state orders arrived 2x faster with 43% lower freight.

Customer Analytics: RFM, Cohorts & CLV | *Python, Pandas, Segmentation* — github.com/dot-hpg/crm-analytics-python

- Segmented customers with RFM scoring, cohort retention and CLV; identified 1,306 loyal customers driving 75%+ of revenue and pinpointed Month 2 as the point where retention drops sharply.

Walmart: Black Friday Spending Analysis | *Python, CLT, Bootstrap, Tableau* — github.com/dot-hpg/walmart-black-friday-clt-analysis

- Analyzed 550,068 transactions with the Central Limit Theorem, confidence intervals and bootstrapping; men spent ~8% more per transaction, but product mix explained 100% of the gap, shifting targeting from gender to category.

Yulu: What Drives E-Cycle Demand | *t-test, ANOVA, Chi-Square, Regression* — github.com/dot-hpg/yulu-hypothesis-testing

- Tested 4 hypotheses on 10,886 hourly rental records; regression explained demand with R^2 0.93, season swung demand by up to 50%, demand grew 65% year over year, and ~81% of rides came from registered users.

Netflix: Content Strategy Analysis | *Python, Pandas, Seaborn* — github.com/dot-hpg/netflix-content-insights

- Explored 8,807 titles across 23 charts: TV's share of new additions rose from 25% to 34% (2018–2021) and 67% of shows ran a single season; delivered ten content-strategy recommendations.

BI Dashboards | *Power BI, DAX, Power Query, Tableau* — github.com/dot-hpg/power-BI-projects-data-analysis

- Built 7 Power BI and Tableau dashboards, including Supplier Performance & SLA (tracking 99.3% SLA compliance for consumables vs. 89.5% for uniforms), Audit Efficiency & Effectiveness, and Education Data Insights.

EDUCATION

M.S. in Computer Science (AI & ML) | Woolf University, via Scaler Neovarsity — In Progress
Advanced Data Science & Machine Learning Program | Scaler Academy — In Progress
Bachelor of Architecture (B.Arch), First Class | School of Planning and Architecture, New Delhi
Certifications: HackerRank SQL (Intermediate, Basics) | NSDC: Python Libraries, SQL, EDA Fundamentals
